

The power of connected minds

 **BASF**
We create chemistry

Polymer Chemist as Scientific Information Analyst Materials & Systems Shanghai (m/f)

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We link and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us. At BASF, careers develop from opportunities.

As BASF is one of the biggest foreign investors in China, an Innovation Campus in the field of polymer and advanced material research has been established. This new research and development site is situated in Shanghai/Pudong.

What you can expect

As Information Professional at BASF Innovation Campus Asia Pacific you will operate as a regional partner for BASF research projects in Greater China and support these projects with business and research relevant information. In close cooperation with our partners in the patent department and research and business units, you will conduct information analysis in order to ensure BASF's presence in future business segments. Furthermore, you will search, validate, analyze and consolidate information of BASF's competitors or of defined technology fields to support strategic decisions made by BASF's research and business units. In this context, you will develop and improve methods to optimize the information management in interdisciplinary teams. You will also represent BASF and its interests in interaction with external networks, partners and companies.

What we expect

You have a profound knowledge in Polymer Chemistry or Material Sciences and you are looking for new challenges abroad? With your outstanding Ph.D. in Chemistry or a related field you are the perfect candidate for supporting BASF in developing new business segments. Whilst working in an international team you have already used your excellent command of English. Moreover, you are a creative teamplayer with strong communication skills and a high customer orientation.

We offer

Responsibility from day one in a challenging work environment and "on-the-job" training as part of a committed team.

Competitive compensation including attractive benefits as well as excellent career opportunities in an international company.

Expect to be surprised by the exciting range of career opportunities at BASF.
