

# The power of connected minds

We create chemistry

## Associate Research Scientist - Advanced Materials Research - Care Materials Shanghai (m/f)

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We link and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us. At BASF, careers develop from opportunities.

BASF has been a committed partner to Greater China since 1885. With major investments in Nanjing, Shanghai and Chongqing, BASF is one of the largest foreign investors in the Chinese chemical industry. We maintain the BASF Innovation Campus Asia Pacific in Shanghai as a research and development hub for the Asia Pacific region, focussing on polymer and advanced materials research, formulation and process engineering.

### What you can expect

As a research scientist at BASF Innovation Campus Asia Pacific, you will develop products for our customers in Asia Pacific in the fields of functional polymers for home and personal care. Our success is based on a sophisticated spectrum of competences, deep understanding of polymer chemistry. As research scientist you will be responsible for a laboratory team, project management and the work within international teams. In order to ensure our competitiveness, you will observe and evaluate scientific trends as well as develop ideas and submit proposals for new projects. Besides documenting and presenting research results, you will also contribute to the intensive cooperation with internal partners from R&D, marketing and our global production sites, to whom you will transfer your new products. This job offers a perfect starting point for further development in business functions or R&D.

If you live outside Europe, please apply here: <http://on.basf.com/15OJSIs>

### What we expect

You have earned an outstanding PhD in chemistry with focus on synthetic chemistry. Additionally, you have a broad expertise in the area of polymer research. You are an entrepreneurially acting, energetic and innovative personality. You are comfortable working in an international team and keen to expand your area of expertise. Furthermore, you are characterized by excellent communication and interpersonal skills as well as creativity, a high degree of motivation and personal responsibility.

### We offer

Responsibility from day one in a challenging work environment and "on-the-job" training as part of a committed team and excellent career opportunities in an international company.
