

The power of connected minds

BASF
We create chemistry

Scientist / Senior Scientist - Integrated Process Engineering Shanghai (m/f)

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We link and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us. At BASF, careers develop from opportunities.

BASF has been a committed partner to Greater China since 1885. With major investments in Nanjing, Shanghai and Chongqing, BASF is one of the largest foreign investors in the Chinese chemical industry. We maintain the BASF Innovation Campus Asia Pacific in Shanghai as a research and development hub for the Asia Pacific region, focussing on polymer and advanced materials research, formulation and process engineering.

What you can expect

As a Scientist / Senior Scientist you are an expert in process engineering and will work on the development and optimization of integrated chemical processes. Your main tasks:

- o You process customer requests and allocate/manage resources for process optimization, troubleshooting and investment projects
- o You develop process concepts and evaluate options and costs
- o You are in charge of the design, execution and data processing of experiments or plant trials
- o You coordinate expert tasks and act as a project manager

What we expect

- o Your academic degree in chemical engineering (MSc or PhD) provide you with a solid background in unit operations and process simulation
- o You have several years of working experience in the fields of research and engineering or production
- o You have extensive knowledge of project management and successfully acquired and managed projects
- o On a personal level, you are able to communicate effectively with experts and customers and successfully build up new collaborations within and across units
- o Your actions support the company's goals at all time and promote a good team environment

We offer

Responsibility from day one in a challenging work environment and "on-the-job" training as part of a committed team.

Join the best team. There are more than 110,000 other minds to connect with.
