

The power of connected minds

BASF
We create chemistry

Associate Research Scientist Resins Shanghai (m/f)

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We link and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us. At BASF, careers develop from opportunities.

BASF has been a committed partner to Greater China since 1885. With major investments in Nanjing, Shanghai and Chongqing, BASF is one of the largest foreign investors in the Chinese chemical industry. We maintain the BASF Innovation Campus Asia Pacific in Shanghai as a research and development hub for the Asia Pacific region, focussing on polymer and advanced materials research, formulation and process engineering.

What you can expect

As a research chemist at BASF Innovation Campus Asia Pacific, you will lead, manage and supervise a lab team and their research activities. The team you will be responsible for is part of polymer focused R&D projects, with you being in charge of project management. You will present and document research results and observe and evaluate scientific trends. In close cooperation with our international teams from R&D, marketing, sales and production, you will transfer new products into the market and thus contribute to the overall business success. This job offers a perfect starting point for further development in Business or Research & Development.

If you live outside Europe, please apply here: <http://on.basf.com/15OJSIs>

What we expect

You have recently finished your PhD in chemistry with remarkable success or you are in the final stages. In the course of your dissertation, you worked on a topic related to organic synthesis or preparative polymer synthesis. You have interests in investigations of organic-inorganic interactions and polymer related coating applications. Besides this, you have excellent communication skills in English. You are highly motivated by research activities. In addition to being a cooperative, responsible team player, you are also able to be assertive when necessary.

We offer

Responsibility from day one in a challenging work environment and "on-the-job" training as part of a committed team.

Competitive compensation including attractive benefits as well as excellent career opportunities in an international company.

Join the best team. There are more than 110,000 other minds to connect with.
